

# Nokia and Trust Your Supplier

A blockchain solution

# What is Trust Your Supplier Blockchain for supplier information

**Trust Your Supplier (TYS)** is a **new blockchain network** designed to **improve supplier** qualification, validation, onboarding and life cycle information management

Open, secure and scalable platform

Elimination of repetition and redundancy

Increased trust

Reduced time to the first transaction

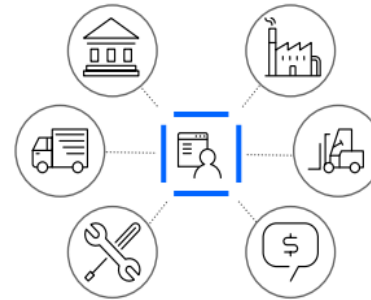

Improves discovery for buyers on the network

Reduced costs

## Challenges

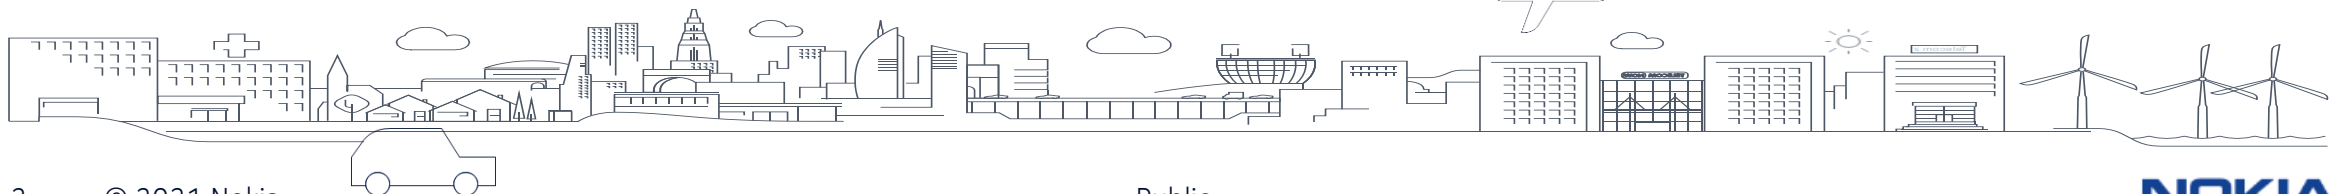

- **Conventional systems** are open to error, fraud, and inefficiency
- Suppliers need to answer similar qualification and screening questions **to multiple customers repeatedly**

## Solution

- **Blockchain provides** a trusted, common, single version of the truth
- With Blockchain, suppliers answer qualification questions **one time** and **share the already completed information** with their customers

Solution across all industries

# TYS is built on IBM Cloud and IBM Blockchain Platform

'I can build new apps using the platform's data and services'

3rd Party Developer

'I have instant access to 360-degree pre-verified onboarding supplier info'

Buyer/Procurement

'I can verify the originality of the certificates easily and built trust'

Verifier and certificate issuer

'I only need to provide my info once'

Supplier

'I can easily access info for all auditing purposes'

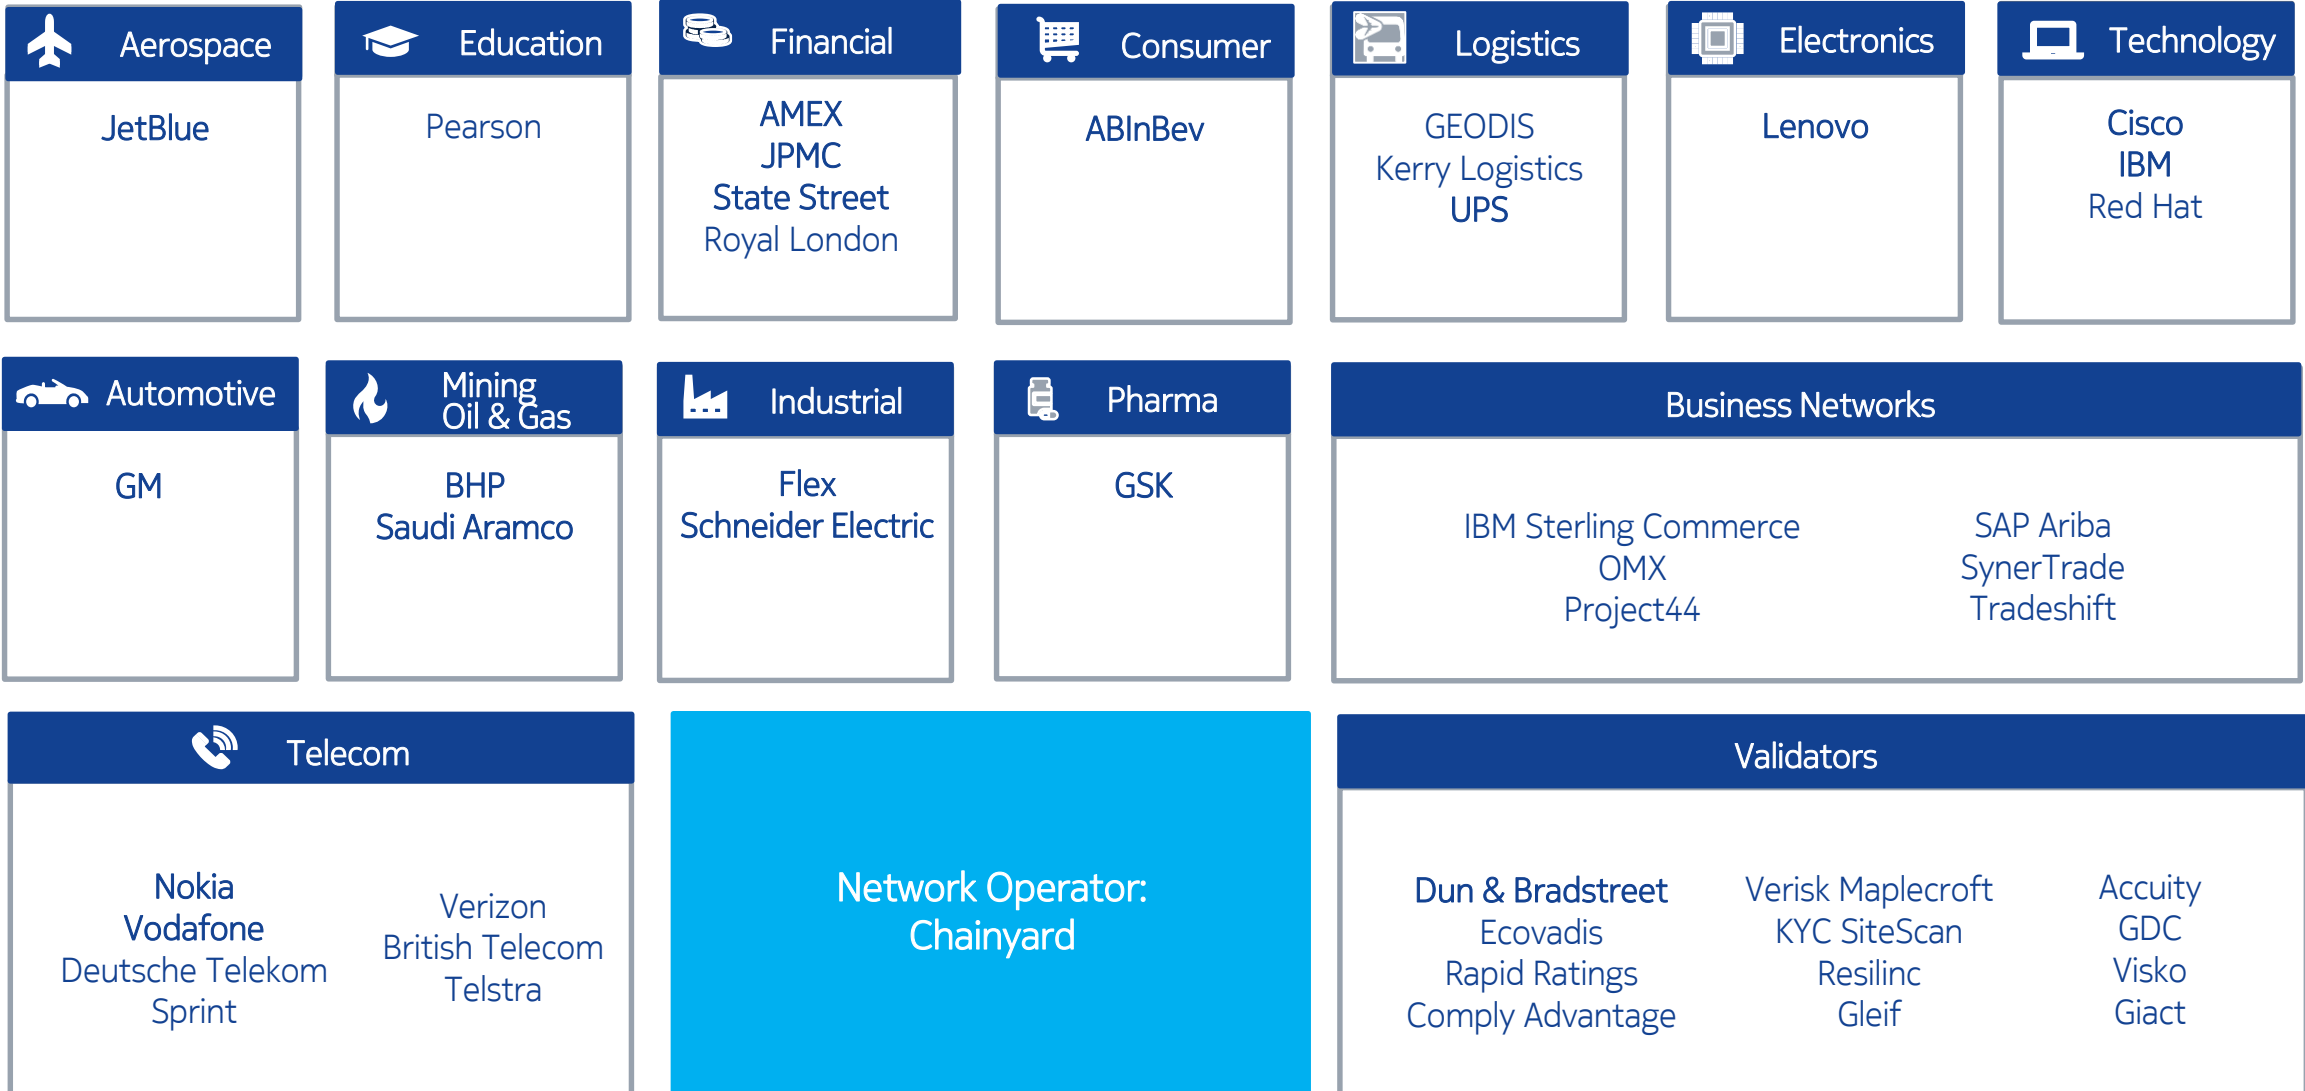

Auditor

'Up-to-date client data allows me to automate onboarding & maintenance plus offer new services'

Business network provider

# Trust Your Supplier – a cross industry network

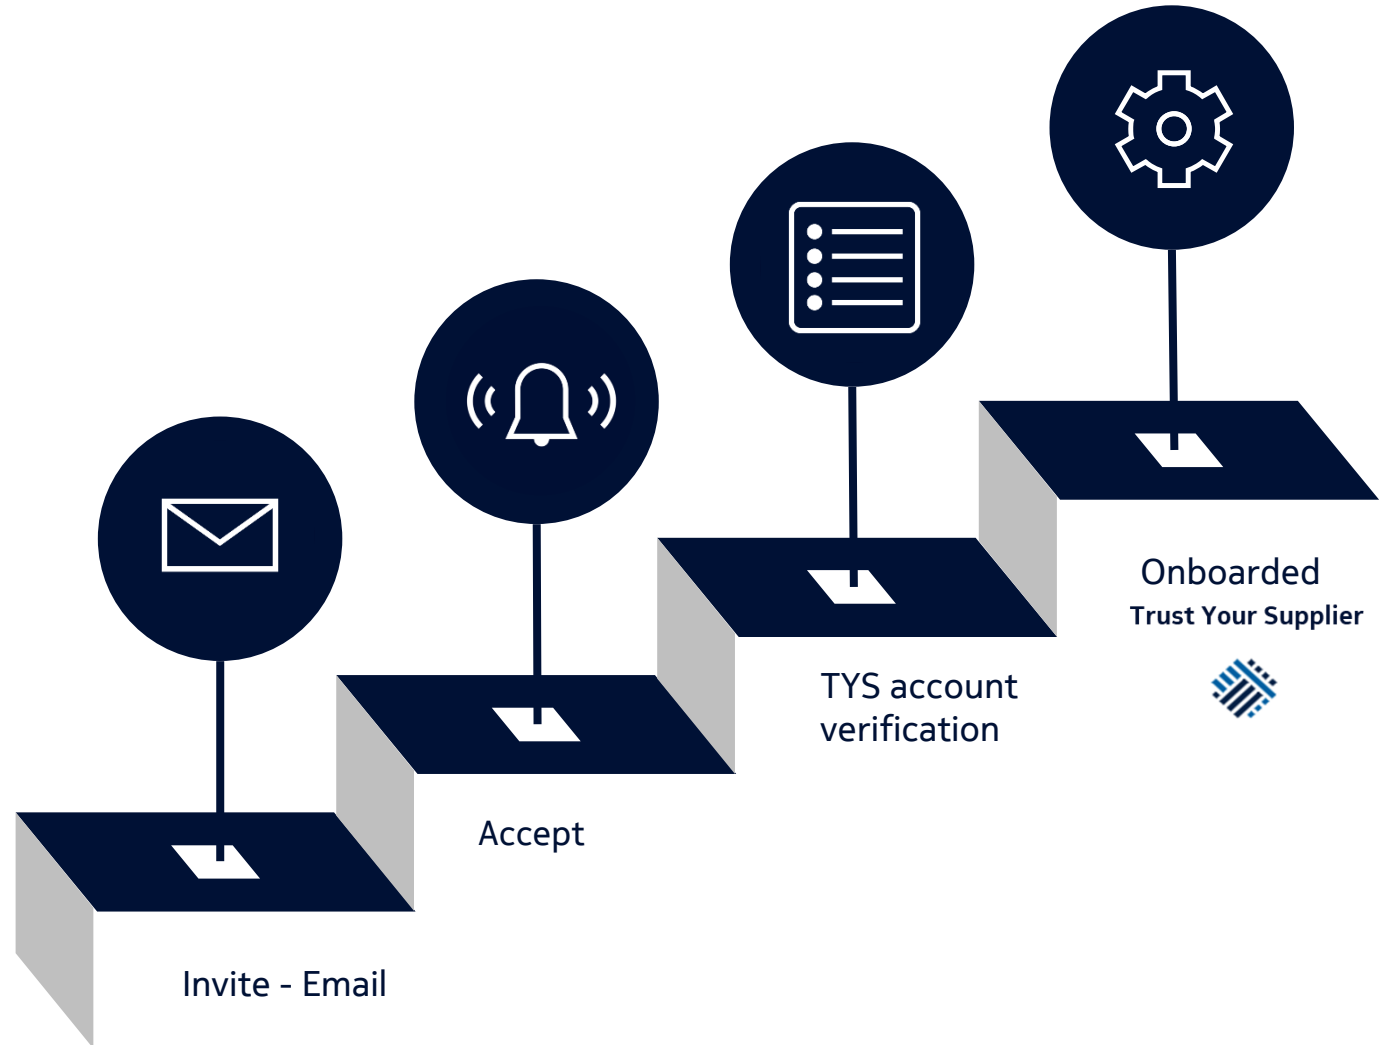

Governance board members in bold

# Trust Your Supplier – FAQ

## **What is Trust Your Supplier?**

Trust Your Supplier (“TYS”) is a blockchain application which hosts a network of suppliers and customers who exchange validated, current, and trusted information about their businesses. TYS enables suppliers to create and maintain a trusted digital identity, and to have access to a vast network of partners. TYS is a platform managed by Chainyard.

## **Who is Chainyard?**

Chainyard, a leader in blockchain consulting, is a dynamic team of blockchain enthusiasts with the expertise, process, and technology required to develop world-class business and software solutions. With a focus on enterprise use cases, Chainyard is helping companies navigate blockchain by working with them to identify value, prioritize opportunities and develop solutions. Chainyard is the owner and operator of the TYS platform which they developed on the IBM Blockchain.

## **Are there other companies besides Nokia involved with this platform?**

Several large corporations have agreed to be on the governance board for this platform and utilize it within their supply chains. These represent leaders in technology, telecom, pharma, beverage, manufacturing and logistics. (Anheuser-Busch InBev, Cisco GlaxoSmithKline, IBM, Lenovo, Vodafone, Schneider Electric, JetBlue, Flextronics and others) plus third-party validators such as Dun & Bradstreet, Ecovadis and Rapid Ratings will provide embedded validation services.

# Trust Your Supplier – FAQ continued

## **Is TYS a global solution?**

TYS is designed as a global SaaS platform. It is currently deployed for use in 69 countries and the implementation continues across 2021. Language support and specific features for a given geography are a part of the overall roadmap. The supported languages currently are English, Spanish, French, German, Portuguese and Italian.

## **How do I use the product?**

You will receive an invitation from Nokia to be a part of the network. Accept the invitation and set-up your company profile and answer the questions. Publish your profile to the TYS blockchain. As other buyers invite you to participate, share your existing profile with them with little or no incremental effort.

## **Can I also become a buyer in TYS and ask my suppliers to share their TYS profiles with me?**

Yes, please contact Trust Your Supplier at [support@trustyoursupplier.com](mailto:support@trustyoursupplier.com) to establish your buyer credentials.

## **Will there be a fee to participate?**

The creation of your secure digital identity profile will be free for you to connect with Nokia Mobile Networks in TYS network. You can also connect to other buyers in TYS with a monthly subscription fee of \$99 USD.
