

Trust Your Supplier

Transforming the Supplier Experience

VS.

Multiple Profiles

Multiple copies of supplier data - one for each of your buyers via different submission methods.

Single Profile

You control a single digital profile for minimal effort to submit to all your connected buyers.

VS.

Fragmented Market Opportunity

High acquisition costs & massive effort to gain new business.

Discoverable

TYS Network brings new business opportunities to you.

VS.

Lack of Data Control

No way to track or manage information and confidentiality once sent to buyers.

Identity Control

Information is owned & controlled by you. The blockchain platform ensures data is secure.

VS.

Repetitive Process

Difficult to keep multiple copies of your data updated, resulting in repetition & outdated information.

Standardization

Standardization of activities across the buyer community reduces redundant work.

Additional Benefits

Standardized Questionnaires

Cross-industry questionnaires reduce workload to submit information to multiple buyers.

Actionable Insights

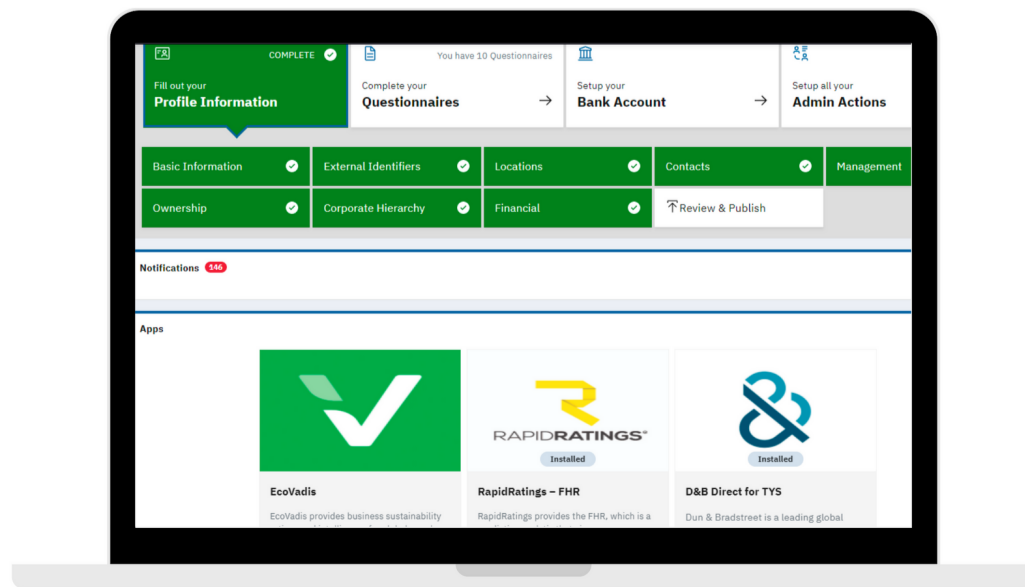

Access to select qualified business partners integrated into your profile and allows you to view your scores in order to make strategic decisions that improve your risk profile.

Document Management

Your TYS Digital Identity serves as a consolidated document hub from which you can pull current information to meet the requirements of your customers and your internal team.

Digital Keys

Digital Keys allow you to take the same information you've completed in your TYS profile and share it with your buyers that are currently not on the TYS network.
